TheStreet's 5 Top Rated Stocks

With hundreds upon hundreds of stocks on the market from which to choose, it can be difficult for investors to navigate the waters to determine the best of the best.

Here at *TheStreet*, our mission is to break through the noise and the clutter and disseminate information to our readers in a way that helps them make wise and informed investment decisions.

To that end, ***TheStreet Quant Ratings*** team has compiled a list of its five top rated stocks. ***TheStreet Quant Ratings***' proprietary stock algorithm has identified these five stocks as the cream of the crop based on the following six factors: Growth, Total Return, Efficiency, Volatility, Solvency, and Income.

TheStreet Quant Ratings has assigned each of the following stocks an A+ rating. This means the company's stock has an excellent track record for providing strong performance with minimal risk, and it is trading at a price that represents good value relative to the company's earnings prospects. While past performance is just an indication, not a guarantee, ***TheStreet Quant Ratings*** believes these stocks are among the most likely to deliver superior performance relative to risk in the future.

That's why the ConvergEx Group (the same company that thousands of investment advisors and hedge funds depend on for mission-critical proprietary software products) awarded TheStreet Quant Ratings with having the 'Best Stock Selection' from October 2007 to the end of February 2009. ***TheStreet Quant Ratings*** helped investors just like you avoid catastrophic losses during the market meltdown.

And ***TheStreet Quant Ratings*** doesn't just work in bear markets—it identifies weak stocks at all times. Even when the market is going up!

TheStreet's 5 Top Rated Stocks

For instance, for the five-year period ending 12/31/15, owning the S&P500 Index would have given you a total return of 60.70%. Amazing right?

But if you cherry-picked only the BEST stocks within our database of 4,300 stocks—those stocks rated a “Buy” by **Quant Ratings**—your total **return would have been 86.16%**.

(By the way, if you like small stocks, our system dominates there, too. The Russell 2000 Index's return of 42.24% over the last 3 years was OK, but buying the Russell 2000 components rated “Buy” by **Quant Ratings** was even better—those stocks were **up 90.97%**.)

TheStreet Quant Ratings Conquers Your Toughest Foe—Your Own Emotions

If you have even an inkling of doubt about the stocks you own today, you must give them a checkup now, before it's too late.

Countless studies of investor behavior have proven one thing—investors are their own worst enemy! They are too greedy when the market is riding high and too afraid when risks are at their lowest.

TheStreet Quant Ratings' data-driven approach takes emotion out of the decision-making process and allows you to focus on what's most important: Owning the best stocks and avoiding the worst.

TheStreet's 5 Top Rated Stocks

✓ **Hard-Core Stock Analysis**

– **TheStreet Quant Ratings** uses its state-of-the-art algorithmic and quantitative computer model to evaluate every stock on 32 different data factors, sifting through income statements, cash flow data, balance sheet metrics, valuation, volatility and much more. The result? A single letter grade from A+ to F, derived equally from risk and reward metrics that tells you how much total return potential the stock has for the next 12 months. Sell the Fs and buy the As and you'll be miles ahead of the average investor!

✓ **Actionable Alerts**

– TheStreet Quant Ratings members get a briefing of all stocks our system is upgrading or downgrading. And you know *first, ahead of the general public*, when it's time to make a change.

✓ **Powerful Predictive Power**

– **TheStreet Quant Ratings'** track record is superior because it tries (and succeeds!) to identify the very few elite stocks that have it all—both high returns AND low volatility.

Flawed screening systems fall into two camps: Either too hot (overvaluing high growth and accepting dangerously high volatility) or too cold (overly risk-averse models that put too much emphasis on controlling volatility and not enough on above-average returns). Like Goldilocks' favorite porridge, **TheStreet Quant Ratings** is just right.

✓ **Institutional–Quality Scrutiny**

– When N.Y. Attorney General Eliot Spitzer forced Wall Street to provide alternative sources of independent research to their clients, many Wall Street firms chose **TheStreet Quant Ratings** to satisfy the requirement. Imagine their embarrassment when our “alternative” ratings proved more accessible, more honest and compiled a better track record of pinpointing stocks to buy and sell!

Wall Street claims it has cleaned up its act, but it still has glaring blind spots—like its unwillingness to issue Sell ratings on stocks. A recent study by FactSet Targets & Ratings showed that a ridiculous 94% of more than 11,500 ratings on S&P 500 companies were Buy or Hold. Get **TheStreet Quant Ratings** if you want the real story - 31% of our ratings are Sells, and you should dump those 1,400+ stocks immediately.

✓ **100% Independent Ratings**

– We accept no compensation of any kind from any of the thousands of companies we rate. **TheStreet Quant Ratings'** evaluations are completely objective, and always will be.
